

Healthcare Testing Services

With the advent of Healthcare Reform and ICD9 to ICD10 mandates, independent validation is a critical function in every organization involved in healthcare. A comprehensive testing/QA program will not only make these transitions smoother, but will lower development costs, identify areas that are in need of remediation and provide management with tools that identify status, progress and concerns. Idexcel's methodology is customized to align with your goals for validation through:

- Strong experience in using the frameworks for developing testing harnesses
- Implementing tools such as QualityCenter™ with a practical and proven roadmap
- Deploying dashboards to provide transparency to all aspects of a testing effort
- Proven paths toward load and performance testing to monitor the stability of large systems

Test Organization & Management

- Coordination with all associated project groups both internal and external
- Synchronization across all platforms and software vendors
- Clear goal setting communications and achievement paths

Dashboard Services

- Monitored, actionable metrics specifically customized to answer the questions deemed critical by the client
- Communication tool between management and executive levels
- Ongoing view of status dynamically updated for constant informational access
- Provides transparency in the testing effort without the encumbrance of many layers of detail

Load Performance Services

- With Healthcare Reform, is your system capacity in line with changes?
- Comparing current capacity to expected capacity to ensure load will not impact availability or service level performance

Test Automation

- We have the skills in the industry tools and the expertise to identify test cases that would work well as automated testing for the largest return on the investments of time and money

Integration/Systems Testing

- With the upcoming ICD9 to ICD10 transformation, there is a need to test the connections between all systems as well as a thorough test across all systems as a whole
- Each vendor may test their own product but our Independent Testing Services will assist in testing the connections between modules/applications and across all applications to provide a holistic view of the system

Onshore/Offshore

- We have options for increasing efficiencies and reducing cost through the utilization of offshore resources as appropriate to the project and client

Test Assessment

- Consulting services
- QualityCenter™ installation, customization, integration and training
- Recommendations for tool and processes as well as projects and artifacts
