

IDEXCEL SERVICES OVERVIEW

Idexcel is a Certified Minority Business Enterprise (MBE) helping organizations across the Public Sector continually adapt and improve their results through innovation. We provide innovative solutions to help public sector organizations modernize their operations harnessing the power of technology, and enable new digital capabilities that reduce costs and bring greater citizen satisfaction. We are an AWS Advanced Consulting Partner, specializing in Cloud Services, Cloud Native Services, Data Platforms & Intelligence, Automation & AI, and Core Modernization. Also, we are working with several public sector clients delivering reliable solutions that make the most of restricted government budgets.

Cloud Services

Idexcel's consultants support customers on their cloud journey, that include migration, maintenance, and optimization.

- **Cloud Advisory:** Idexcel's AWS experts help customers architect systems using best practices and the AWS Well-Architected Framework.
- **AWS Well-Architected Framework Review:** A consistent approach for customers to evaluate architectures, and implementation guidance for scalable designs to meet application requirements.
- **Migration Services:** Our Cloud Migration methodology addresses gaps in foundational areas, leverages the AWS ecosystem, reduces migration risks and focuses on future innovations.
- **Managed Services:** We automate the process of AWS infrastructure management for efficient achievement of industry best practices for your organization.

What Makes Us Different

- **100+ AWS Certified Cloud Professionals**
- **Our Culture of Innovation Introduces Emerging Technology to Customer Engagements**
- **Diverse Expertise in the Full Lifecycle of IT Solutions Delivery**
- **AWS Centric Approach to Solutions Design**

Cloud Native Services

Our Cloud Native Services approach is agile, efficient, and enables organizations enhance their ability to build faster to market innovative solutions.

- **Cloud Native Development:** We facilitate transition to cloud-native architectures, instituting software development practices that reduce cost through containerization, increase productivity and encourage innovation.
- **DevOps Transformation:** Idexcel's DevOps as a Service enables agile development teams to focus on core strengths by delivering a 'as a service' environment, customized for your organization's needs.
- **Open Source:** Open-source technology is an essential component of IT innovation, effectiveness and business value creation. It provides an excellent alternative to proprietary software.

Data Platforms & Intelligence

Iindexcel's data practice team has extensive experience in navigating and accelerating the data digital transformation journey of its customers. The solutions include:

- **Data Platforms Modernization:** We create a comprehensive enterprise-wide data centric strategy tailored to your organizational strategic goals.
- **Data Strategy and Advisory:** We fast track data migration from hybrid or on-premises sources into AWS to reveal meaningful, actionable insights for decision makers.
- **Data Intelligence and Visualization:** We implement customized data visualizations based on your business processes and surveillance metrics.

Automation & AI

We consult with our clients to better understand their needs and determine the right tools & technologies for optimal market alignment.

- **AI in the Cloud:** Iindexcel leverages existing AI/ML services offered by AWS as a foundation for custom solution application development.
- **Augmented Intelligence using - AI:** Iindexcel uncovers opportunities to automate workflows using AI.

- **Invisible Automation:** We implement RPA based automation to improve operational efficiency.
- **AIDE - AI Data Extraction:** Our AI-powered intelligent data extraction framework enables organization to eliminate errors due to manual data entries and observe hidden trends in data.

Core Modernization

Our Modernization Services help organizations transform web-based legacy applications to enhance business agility with digital technologies in a non-cloud environment.

- **Iindexcel's Modernization Services** assist organizational transformation from web-based legacy applications to enhance business agility with digital technologies in a non-cloud environment.
- **Application Development:** We offer application development and customization services to increase competitive advantage, decrease costs and improve efficiencies using: Java, Node.js, React, RoR, AngularJS, Python.
- **Application Maintenance:** Our services provide on-demand and continuous application maintenance using proven methodologies to keep your apps running and drive revenue at an optimal capacity.
- **Application Optimization and Modernization:** Iindexcel's services assist you in upgrading your legacy application to next-generation architecture and maximize agility, flexibility, productivity, and profitability.
